14 years crafting products · 7 years leading teams · Meta · Procore · Counsyl

ABOUT

Design leader specializing in AI-driven products, scalable design systems, and cross-platform UX. Leads with clarity in ambiguous spaces — building inclusive teams, aligning design strategy to measurable outcomes, and shipping work that earns trust from engineering, product, and the people who use it.

EXPERIENCE

Meta

Jun 2022 – Present

Senior Manager, Product Design

- Led launch of Ray-Ban Meta smart glasses and the Meta AI app — pioneering ambient AI experiences in consumer hardware.
- Recruited and mentored a 15-person Product Design team on the Wearables Design Systems team.
- Delivered the Wearables Design System across Desktop, Web, and Mobile companion apps, ensuring cohesive brand at scale.
- Built and leveraged AI tooling to accelerate design workflows and prototype agent interactions — search, chat, knowledge discovery.

Procore

Jan 2020 – Jun 2022

Senior Manager, Product Design

- Scaled a comprehensive design system serving 65+ designers — overseeing documentation, governance, and adoption.
- Launched design.procore.com as the canonical internal design system documentation site.
- Rebuilt all Figma component libraries using variants and interactive features, establishing org-wide best practices.

Counsyl

Jul 2018 – Jan 2020

Design Lead Manager, Product Design

- Owned end-to-end UX for the patient portal, delivering complex genetic testing results through an empathetic, accessible interface.
- Managed 3 designers; partnered with Marketing to establish a unified visual language across all business units.
- Conducted patient interviews, usability testing, and journey mapping workshops to ground decisions in user empathy.

AutoGravity

May 2016 – Aug 2018

Lead UX Designer

- Launched highly-rated iOS, Android, and web apps overseeing all UX design and research end-to-end.
- Led UX for white-label product launches including a major partnership with Fletcher Jones.

Evisions

Jan 2014 – May 2016

UX Manager

- Oversaw UX research and design for a flagship research SaaS product, building a user-centric design culture.
- Created the 'Living Design System' with front-end engineers using Semantic UI across all product lines.
- Redesigned the IRB research product, resulting in strong customer reviews and measurable adoption growth.
